Vision Statement

Safety Envirotoxyn Nigeria Limited envisions a world where the impact of oil spills is minimised, and waste recycling is prioritised for a sustainable future. We are committed to providing efficient and effective solutions for environmental remediation and waste management.

As an organisation, our most important focus is on the remediation of oil spills. We understand the detrimental consequences such incidents can have on ecosystems, communities, and livelihoods. Our team is dedicated to responding promptly and responsibly to minimise the environmental damage caused by these disasters.

We recognize the urgency and importance of oil spill remediation in Nigeria, and we strive to be at the forefront of innovation and technology in this field. Our goal is to restore affected areas to their original ecological state, ensuring the preservation of biodiversity and the sustainability of natural resources.

In addition to addressing oil spills, Safety Envirotoxyn Nigeria Limited places great emphasis on waste recycling. We understand that the mismanagement of waste can lead to various environmental issues, such as pollution, health hazards, and resource depletion. With this in mind, we aim to promote a circular economy that prioritises the reduction, reuse, and recycling of waste.

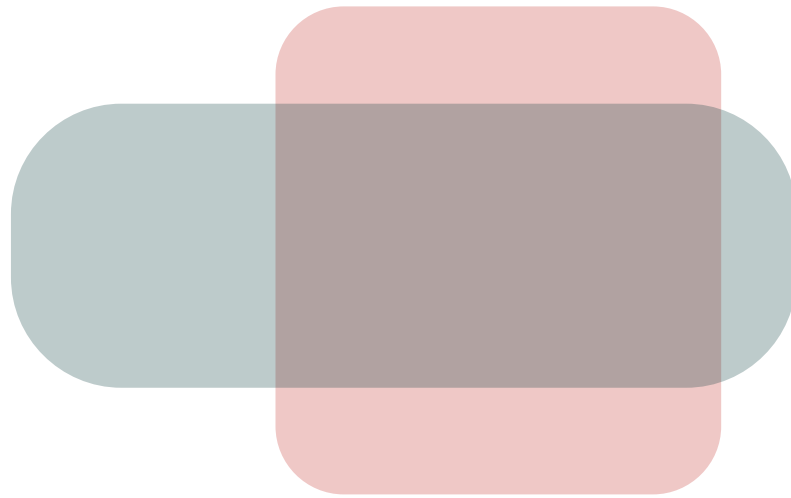

Our commitment to waste recycling extends beyond mere compliance with regulations. We actively seek innovative solutions to maximise the recovery of valuable resources from various waste streams. By reducing the amount of waste sent to landfills and promoting the use of recycled materials, we contribute to the conservation of natural resources and the reduction of carbon emissions.

Together, let us create a greener, cleaner, and more sustainable future through the proper remediation of oil spills and the effective management of waste.

Our Core Values

- **Environmental Stewardship:** A commitment to protecting and preserving the environment through responsible and sustainable practices.
- **Integrity:** Demonstrating honesty, ethics, and transparency in all actions and interactions, upholding high professional standards.
- **Innovation:** Emphasising continuous research and development to find innovative solutions that contribute to environmental sustainability.
- **Collaboration:** Fostering partnerships and working cooperatively with stakeholders, clients, and communities to achieve shared environmental goals.
- **Safety:** Prioritising the safety and well-being of employees, clients, and the environment through adherence to industry best practices and regulations.
- **Sustainable Practices:** Promoting environmentally friendly practices that minimise resource consumption, waste generation, and carbon emissions.
- **Social Responsibility:** Recognizing the interdependence of environmental, social, and economic factors, and striving to create positive impacts on local communities.
- **Excellence:** Striving for excellence in all aspects of operations, including service delivery, project implementation, and customer satisfaction.
- **Adaptability:** Being flexible and adaptable to evolving environmental challenges and incorporating new knowledge and technologies into practices.
- **Education and Awareness:** Promoting environmental education and awareness to empower individuals and organisations to make informed decisions and take actions towards sustainability.

PRODUCT AND SERVICES

Recycling & Waste Management

Recycling is no longer just a moral obligation; it's a strategic move that aligns with sustainability goals and resonates with eco-conscious consumers. As an organisation, we are in the business to make significant impact, reduce waste, and demonstrate our commitment to a greener future.

Why Choose Our Recycling Services:

1. Comprehensive Recycling Solutions:

Our recycling services cover a wide range of materials, from paper and cardboard to plastics, glass, and electronics. We provide a one-stop solution for all your recycling needs.

2. Environmental Responsibility:

By choosing our recycling services, you're actively participating in the global effort to reduce landfill waste, conserve natural resources, and combat climate change. Our processes are designed to minimize the environmental footprint.

3. Cost-Effective Waste Management:

Recycling has led to cost savings in waste disposal. Reduce landfill fees and disposal costs by diverting recyclable materials from regular waste stream.

Marine Support Services

In accordance with the World Health Organization's standards and global vision of protecting the environment from the adverse effects of toxic chemicals and ensuring a sustainable environment for healthy living, SET has designed specialized services to meet the needs of our highly esteemed clients.

In a bid to rendering these services effectively and efficiently, we have hired a highly knowledgeable, experienced and technically competent working team whose focus is to meet clients' specifications and various internationally set standards of safety and environmental assessment.
